Summary:

Innovative React.js developer with two and half years of experience in designing and developing responsive and user-friendly web applications with optimized application performance. Offering expertise in front-end development with a deep understanding of HTML5, CSS3, and JavaScript, coupled with expertise in state management with Redux, that allows to create scalable and efficient Web Pages. Seeking a good position to utilize my skills and abilities towards the growth of the organization through continuous learning and professional growth while being resourceful, innovative, and flexible.

Skills:

Languages & Tech Stack: ReactJs, Redux, HTML, CSS, SAAS, MaterialUI, Bootstrap, Javascript, NodeJs, NPM Packages.

Unit Testing: React Testing Libraries such as Jest and Enzyme

Project Management Tools: JIRA, Azure Devops, SonarQube

Development Tools: Visual Studio Code

API Testing Tools: Postman, JWT

Version Control: GitLab and GitHub

Work Experience:

Working as a System Engineer in TCS from Nov 2020 – till date

ROLES AND RESPONSIBILITIES :

- Expertise in desining web pages using JavaScript, HTML, CSS.
- Developed and maintaied modular react components for a web application, resulting in improved code resuability and efficiency.
- Integrated RESTful APIs to fetch and update data, ensuring seamless dataflow and synchronization with the backend.
- Implemented responsive designs and optimized application performance, resulting in a 20% increase in page load speed.
- Ensured good code coverage (a minimum of 80%) by implementing unit test cases using React Testing Libraries and Jest.
- Integrated LoginPage with different connectors such as MSAL and SAP to provide authentication for an user.
- Collaborated with cross-functional teams to gather requirements, plan project timelines, and ensure successful project delivery within tight deadlines.
- Conducted code reviews and provided constructive feedback to team members, improving code quality and adherence to best practices.

- Utilized Git for version control and collaborated with team members using tools like GitHub and GitLab.
- Integrated new features to the existing application ensuring that it functions reliably, efficiently, and meets the needs of its users.
- Deployed application on different servers through CI/CD pipeline like Jenkins and tracked the code coverage percentage through sonarQube tool.
- Involved in production deployments and also fixed the production issues in quick time.
- Actively participated in Agile ceremonies, including sprint planning, daily stand-ups, and retrospectives.

HIGHLIGHTS :

- Elevate Wings Award in ReactJs
- On The Spot Award for Development
- Best Team Award
- Applause for Team Award
- Fresco Play Miles Award
- Many Client appreciation Mails for the good work.

PROJECT DETAILS

Client : Albertsons (from nov-2020 to feb-2022)

Project Domain : UI development

Current Role : ReactJs Developer

Project Description :

- Involved in day-to-day operations of designing, developing web pages and reusable components in ReactJs.
- Understanding the functionality of the Web page and writing the functionalities using JavaScript and React Libraries in VS code IDE.
- Code compilation and integration of the UI code with the services provided from Back-end.
- Using Bootstrap and CSS to make the page Responsive.
- Implemented unit test cases using React libraries, Jest by Mocking up the data for various sections of the code. Achieved overall 80% code coverage.
- Handled review call with clients effectively and got appreciations from the client for the same Implemented Error handling in Back End and integrated with Azure Log Analytics.
- Worked with an internal tool, generates React Code UI components using Forward and Reverse Engineering on Mainframe Script.
- Integrated the Login page and the other Web pages with MSAL in order to provide the security.

Client : Bayer (from march-2022 to till now)

Project Domain : UI development

Current Role : ReactJs Developer

Project Description :

- Involved in creating UI for the E-commerce responsive site.
- Implemented sorting, displaying video features of the products, Enlarging Pdfs using React Libraries.
- Implemented pagination in order to reduce the load on the page.
- Developed notifications tab and integrated it with various APIs from Back End
- Designed tables with React data table component which is based on material-ui.
- Integrated the Login page with the SAP login connector with the help of Gigya API Key.
- Handled the routing to the webpages based on Login Authentication and Providing Authorization to the different webpages based on the User-roles.
- Handled the language translation for different countries.

PERSONALITY TRAITS

• I organize, plan, and prioritize my work to manage time wisely.

• I co-ordinate with team and exchange ideas for a better resolution.

• I managed a team named Partner Cards and led it during offshore hours.

• Being a developer, I make use of my creativity to code efficiently and optimize it.

• I worked for three different teams in my project and was able to adapt to different people and work.

 • I supported working late nights during production releases and deadlines.

EDUCATION & ACHIEVEMENTS

BTECH - ELECTRONICS AND COMMUNICATION ENGINEERING

With CGPA of 8.7

VIGNAN'S INSTITUTE OF INFORMATION TECHNOLOGY

JNTUK Affiliated

 2016-2020

BOARD OF INTERMEDIATE EDUCATION

With 97% in MPC

 SRI CHAITANYA JUNIOR COLLEGE

2014-2016

SECONDARY SCHOOL CERTIFICATE(SSC)

With CGPA of 9.8

SRI CHAITANYA TECHNO SCHOOL

2013-2014

DECLARATION

 I hereby declare that all the information mentioned above is true and correct to the best of my knowledge.
